How to properly care for your lenses

- Always wash your hands before inserting/removing your contacts.
- When removing the lens place it in the proper disinfecting solution.
- Replace your lenses according to the doctor's instructions (ex. monthly, weekly, daily.)
- Do not over wear your lenses.
- Replace your lens case every 2-3 months.
- Rest your eyes often with a good pair of glasses.

Year Supply, why to buy.....

Digby Eyewear

The contact lens fitting

Once the comprehensive eye exam is complete, your doctor will discuss contact lens options and schedule you for a contact lens evaluation. This includes evaluation of the lenses on your eyes to ensure good ocular health and fitting as well as optimal vision. Included in the fitting are up to 6 pairs of trial lenses and up to 60 days of follow-up visits to maintain success. Fitting fees are below and are charged yearly with the contact lens exam.
